

RAGHAV AHUJA

Vancouver, BC | (236) 333-8081 | raghav_ahuja@sfu.ca | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

Programming Languages:	JavaScript, TypeScript, Python, Java, Go, C/C++, SQL
Web Technologies:	React.js, Next.js, Node.js, Express.js, Spring Boot, FastAPI, GraphQL, tRPC
DevOps/Cloud Tools:	AWS (EC2, S3, Lambda), Azure, Docker, Kubernetes, Jenkins, Terraform
Database:	PostgreSQL, MySQL, MongoDB, Snowflake, Qdrant
AI & Agents:	LLM orchestration, MCP, RAG, AI Agents, Intent Routing, LLM-as-judge, Prompt Engineering

PROFESSIONAL EXPERIENCE

[InworldAI](#)

Vancouver, Canada

Software Engineer intern

August 2025 – April 2026

- Shipped 6 core **primitives** for the **Inworld Runtime SDK** (including Knowledge and MCP nodes), enabling teams to build and deploy **AI agents** without custom orchestration or workflow logic
- Built **scalable backend** services and **REST APIs** for billing, credits, subscription tiers, and payment workflows using **event-driven** architecture, contributing to a 20% increase in B2C revenue
- Integrated **Ultravox** into the **Realtime API** by extending **streaming** and **multimodal pipelines**, enabling **low-latency** voice-based interactions for end users
- Reduced **LLM cost-per-request** by **20%** and improved **reliability** by **15%** through **Inworld Routers**, enabling cost and **latency-aware** model selection with **automatic failover** across a **unified API endpoint**
- Designed **asynchronous event-driven workflows** using **Pub/Sub**, enabling scalable communication between **distributed backend services** while reducing service coupling

[Horizon Zones International](#)

Mississauga, Ontario

Software Engineer Intern

May 2025 – August 2025

- Built an internal admin CMS with **RBAC** from scratch, cutting manual content update effort by **60%** and turnaround time for site changes by **20%**
- Expanded the CMS into a multi-role project management platform, centralizing operations for \$10M+ construction projects with **role-based workflows** and real-time data management
- Reduced routine project workflow overhead by **~40%** by shipping **AI-driven automation pipelines**, directly improving team throughput and execution speed
- Engineered a **backend reporting service** with **reusable templates** and **REST APIs** for 3+ stakeholder teams, reducing report generation time and accelerating decision-making by 25%
- Configured **CI/CD** pipelines with **GitHub Actions**, established **version control** workflows, and wrote **automated tests**, reducing deployment errors by **50%** and accelerating release cycles by **30%**

TECHNICAL PROJECTS

[AgentFlow](#) | Python, Typescript, MCP, SQL, Inworld Runtime

January 2026 – February 2026

- Developed a **multi-agent AI system** by architecting orchestration with **sub-agent delegation**, **chained-tool calling** and **MCP integration**, enabling scalable automation of complex, multi-step tasks
- Improved cost-efficiency and response quality by 30% through **intent-based model routing**, **context optimization**, and automated evaluation pipelines, reducing token usage while maintaining accuracy

[PodcastAI](#) | CMPT 276 | Node.js, Express.js, React.js, Firebase, Git

September 2024 – November 2024

- Engineered an **asynchronous** document-to-podcast pipeline using **Node.js**, **Express**, and **Google Long Running Operations**, implementing **job polling**, **prompt orchestration**, **SSML generation**, and fault-tolerant **TTS processing**
- Built a **full-stack React** and **Firebase** application serving 2,000+ users with real-time **job status updates**, **cloud storage integration**, and **queue-based** request processing for **concurrent** audio generation

EXTRA CURRICULAR

Director of Merchandise, SFU SURGE

January 2023 – Present

- Led design and vendor coordination for Storm Hacks, delivering 1,200+ branded items per event on time and within budget across multiple hackathon cycles

EDUCATION

Simon Fraser University, Vancouver, BC

January 2022 – Present

Bachelor of Applied Science, **Computing Science**

Minor: **Economics**
